EDUCATION

Keshav Memorial Institute of Technology Aug 2024 – Expected Sep 2028
B.Tech, Computer Science and Engineering *CGPA: 8.8125*

EXPERIENCE

AI Research Intern Feb 2026 – Present
LLMLens Paradigm, String of Pearls / K-Hub, KMIT

- Investigated the limits of uncertainty-based hallucination detection through evaluations spanning 4 LLM families and 5 benchmark datasets.
- Built reusable evaluation pipelines using Hugging Face Transformers and GPU-accelerated inference, and contributed FastAPI backend features to support LLMLens evaluation workflows.
- Implemented routing and verification logic for selecting specialist adapters or retaining base-model responses, with fallback handling when evidence was insufficient.
- Evaluated routing decisions against base-model outputs, examining answer quality, failure cases, and additional inference cost within a shared research framework.

PROJECTS

HeliVision — Assistive Vision Helmet 2025

- Proposed the concept and led software development for a helmet prototype that translates vehicle detections into directional visual cues and spoken alerts.
- Integrated TensorFlow Lite SSD-MobileNetV2 detections with a Raspberry Pi 3B+, a 0.96-inch OLED, and directional indicators; demonstrated vehicle detection during an outdoor walk test.
- Resolved camera compatibility issues using `Picamera2`, separated capture from detection, and added automatic image cleanup to keep stored outputs bounded.

StreamWatch — MongoDB Application Observability 2025 – 2026

- Built a React and FastAPI workspace combining MongoDB data exploration, AI-assisted querying, and embedded Grafana dashboards.
- Instrumented application query traffic, request latency, and AI query outcomes with Prometheus; integrated Grafana panels for application activity and host resource usage.
- Separated request history from aggregate metrics to keep Prometheus labels bounded, and added regression checks for successful, blocked, and failing query paths.

TECHNICAL SKILLS

Languages:	Python, Java, C++, JavaScript, SQL
Web & Backend:	React, FastAPI, Node.js, Express
Databases:	MongoDB
AI/ML:	Hugging Face Transformers, TensorFlow Lite
Developer Tools:	Git, GitHub, Linux, Docker
Monitoring:	Prometheus, Grafana

ACHIEVEMENTS

- HeliVision patent application published (#202541100066); under examination.
- First author of a research manuscript submitted to *Knowledge and Information Systems* (KAIS); with editor.
- 2nd Prize — Prakalp-2025 Innovation Competition, KMIT, as part of the HeliVision team.

CERTIFICATIONS

OCI AI Foundations Associate (2025) • OCI Foundations Associate (2025) • Anthropic: Introduction to Model Context Protocol • Anthropic: Model Context Protocol – Advanced Topics
